## Education

---

**Bachelor of Computer Science, Misr Higher Institute For Commerce & Computers** 2023 – Present  
Current GPA: **2.49** Mansoura

## Internship

---

**Software Testing Trainee, Digital Egypt Pioneers Initiative (DEPI)** 12/2025 – 07/2026  
Hybrid

- **Overview:** Completed an intensive Software Testing track covering ISTQB V4.0 fundamentals and testing throughout the SDLC.
- **Technical Skills:** Gained a strong foundation in Java Programming and applied Static Testing Techniques using Jira.
- **Tools & Automation:** Utilized industry-standard tools including Postman for API testing and Selenium for automation.
- **Test Management:** Studied Test Analysis & Design and managed test activities within Database and Agile environments.
- **Modern Techniques:** Leveraged Prompt Engineering to optimize testing workflows and delivered a comprehensive Capstone Project applying all learned skills.

**QC Member (Internship), MedicaSpace** 01/2026 – 04/2026  
Remote

- **Overview:** Took full responsibility for Quality Control of the Partnership Program web module during a 3-month internship.
- **Testing Execution:** Executed full End-to-End (E2E) user journeys for the Partnership Program web feature and verified web UI responsiveness across various desktop and mobile browsers.
- **Bug Tracking & Management:** Discovered and identified critical software defects, including email delivery failures and race conditions, logging and managing clear bug tickets on ClickUp.
- **Performance & Environment:** Tested web application behavior under different network speeds and simulated connection drops utilizing Chrome DevTools.
- **Tools & Technologies:** ClickUp, Postman, Chrome DevTools, Web Testing, E2E Testing.

## Projects

---

### Project 1: Test Scenarios Portfolio (Real-World Apps)

- **Role:** Manual Software Tester
- **Tools:** Trello, Manual Testing Techniques
- **Description:** Created a comprehensive portfolio documenting **Test Scenarios** for major applications including **Facebook, X (Twitter), Talabat, and Udemy**. Analyzed complex modules such as **Authentication, Search, and User Discovery** to ensure full test coverage. Documented positive and negative scenarios to validate system behavior.
- **Link:** <https://trello.com/b/UFA2Ilo3> 📄

## Project 2: Reqres.in API Test Collection (Postman)

- **Role:** API Tester
- **Tools:** Postman, JavaScript, JSON Schema, REST API
- **Description:** Created a Postman API testing suite with over 95 automated tests for the Reqres.in [mock](#) API. Tested all CRUD operations (GET, POST, PUT, DELETE) and user authentication. Checked HTTP status codes (200, 201, 204, 400, 404). Validated JSON schema data types, email formats, and ensured API response speed is under 1000ms.

## Project 3: Contact List App - Agile Test Management

- **Role:** QA Tester
- **Tools:** Jira, Postman, BDD / Gherkin, Agile (Scrum)
- **Description:** Built a complete Agile testing backlog in Jira for a full-stack web app. Created 3 Epics (Authentication, Contact CRUD, API Testing) and 9 User Stories. Wrote 36 clear BDD (Given/When/Then) test scenarios covering successful logins, errors, and API status codes. Defined clear acceptance criteria and used story point estimation for developers.

## Skills

---

- **Testing Types:** Manual Testing, Automation Testing, API Testing, Web & Mobile Testing, E2E Testing, Functional & Usability Testing.
- **Testing Tools & Frameworks:** Postman, REST Assured, Selenium WebDriver, Jira, Zephyr Scale, Trello, ClickUp, Chrome DevTools.
- **Methodologies & Concepts:** Agile (Scrum), STLC, SDLC, ISTQB V4.0, Bug Reporting, Test Cases & Scenarios, Page Object Model (POM), OOP.
- **Programming & DB:** Java (Basics to Automation logic), SQL Fundamentals.
